

CURRENT EVENTS

(Posting May 2015)

The Planning Commission is in the process of rewriting the Blendon Township's MASTER PLAN (Ottawa County Smart Growth Program). Every five (5) years the township is required by law to rewrite or revise their Master Plan.

The reason I place this article in "Current Events" is to let you know what is happening, and to give you the opportunity to participate in the discussion on issues important to Blendon Township owners and residents. The Open House was a great beginning but we need your telephone calls, e-mails, letters and personal visits to further the discussion on the future growth of Blendon Township.

We would like a discussion on what it means to you, on subjects such as dusty roads, water service, sewer service, land zoning requirements, drains, dead trees, rural character, and changing from agriculture to developed property, etc.

Give us your best ideas on the future growth of Blendon Township. I know we are in a transition from agriculture to more developed area, and getting there is difficult for all of us. We all would love rural character in Blendon but we also know that development causes great changes. I hope to hear your ideas. Feel free to contact your elected officials and let us know.
